

Local Ride Network - How to Order a Trip

To order a trip with First Choice:

1. Open the app and you will be taken to the map screen.
2. Long touch (just hold your finger for a couple of seconds) on where you want to go, or enter your address in the top banner space.

You will see a blue line drawn from where you are to where you want to go. Don't worry if it is out a bit...

3. Look for a FC driver in the area, if you don't see one then expand the map slowly until you see one.

The red cars are busy; the green ones are ready to serve you. The screen will refresh each time you move or resize the map.

4. Select a car by touching on it, and you will be presented with the picture of the driver, a picture of the car, more information including an estimate of the cost of the trip.

You may change your selection to any car on the screen.

5. Touch on "Request Ride" to signal the car to pick you up, note that the colour of the car will change to indicate the driver received your call.

When the driver accepts your call, the car will again change colour; please be patient, the driver may be busy.

Now you can watch as the car approaches your location.

Don't forget to rate the driver and the car for a job well done.
